SUMMARY

Driven computer science student with expertise in cloud platforms, database engineering, algorithms, and problem-solving. Enthusiastic about applying technical skills to practical projects with a strong desire to continuously learn and master emerging technologies.

SKILLS AND SOFTWARE

Programming & Technical Skills: Python, SQL, PySpark, Data Structures & Algorithms, Object-Oriented Programming (OOP), ETL/ELT, DAG Development, Data Processing, Data Pipelines, Data Warehousing, Data Ingestion, Transformation, Validation, Data Visualization.
Cloud & Data Tools: Microsoft Azure (Data Factory, Databricks, Delta Lake, Synapse Analytics), Apache Airflow, Snowflake, Power BI, Git, MySQL, MongoDB, Neo4j, SSMS.
Soft Skills: Problem Solver, Leadership, Communication, Team Collaboration, Time Management, Attention to Detail, Knowledge Sharing.

PROJECTS

Azure Based End to End Data Pipeline for NYC Taxi Trips (Github Link) **Mar 2024**

- Developed a data pipeline for NYC Taxi data using ADF, Databricks, and Delta Lake with Medallion Architecture (Bronze, Silver, Gold).
- Enabled versioning, time-travel, and efficient querying using Delta Lake to support governance and real-time analytics.
- **Technologies: Azure Data Factory, Azure Databricks (PySpark), Azure Delta Lake, Azure Blob Storage, Azure Monitor.**

Real-Time Weather Data Streaming on Azure (Website Link) **Aug 2025**

- Engineered an end-to-end real-time weather data streaming pipeline on Azure, ingesting, processing, and storing live weather data. enable scalable and fast time-series analytics.
- A real-time anomaly detection and alerting with Azure Data Activator, enhancing proactive monitoring and timely incident response.
- **Technologies: Databricks, Azure Functions, Azure Event Hub, Azure Data Explorer, Microsoft Fabric, Power BI, Azure Data Activator.**

Question-answering (QA) system for movie dataset (Github Link) **Dec 2024**

- Built a robust Question-Answering System using NLP and Neo4j Graph Database to process and query on 1M+ movie dataset.
- Extracted knowledge graphs from movie metadata (e.g., genres, actors, directors) and enabled natural language query processing.
- **Technologies: Neo4j, MongoDB, Python, Flask, CoreNLP, spaCy, Stanza.**

EXPERIENCE

Cleveland State University, Cleveland, USA.

- **Teaching Assistant – Database Systems and Processing** **Jan 2025 –Present**

Guide students in writing SQL queries, designing normalized relational databases, and indexing and query optimization techniques.

- **Teaching Assistant – Data Structures and Algorithms** **May 2024 – July 2024**

Guided students on DSA concepts including recursion, sorting algorithms, graph theory and dynamic programming.

Hudl, Mumbai, India.

Assist Success Analyst **Jan 2022 – Aug 2023**

- Analyzed performance data for ~160 analysts across 8 teams using SQL queries on Redash. Built a semi-automated performance tracking system, reducing manual reporting by 60%.
- Created weekly dashboards to identify underperformers and high performers, driving data-driven decision-making.
- Delivered insights to team leads that led to targeted interventions and a 23% performance improvement over 3 months.

Trainer & R&D Analyst **Aug 2020 - Dec 2021**

- Tested internal tools for usability and reported detailed product feedback to R&D for iterative improvements.
- Designed onboarding content and trained 30+ new analysts on tools, workflows, and quality benchmarks.

Sports Analyst **Aug 2019 – Aug 2020**

- Analyzed NCAA game footage across football, basketball, and soccer using Hudl's tagging tools.
- Generated data-driven reports from video and event logs to support coach strategies and decisions.

EDUCATION

Masters in Computer Science, Cleveland State University **Aug 2023 - Dec 2025**
Course Work: Database systems, Data mining, Big data, Machine learning, Artificial intelligence, Data Structures and Algorithms. **GPA: 3.97**

Bachelors in Electronics Engineering, University of Mumbai **Oct 2016 - Mar 2019**
Course Work: Applied Math, OOP, computer communication network, digital system design, digital communication, VLSI Design.

CERTIFICATIONS

- **Learning Microsoft Fabric -** certificate link
- **Learning Apache Airflow –** certificate link
- **Complete Guide to Databricks for Data Engineering -** certificate link
- **Introduction to Modern Data Engineering with Snowflake -** certificate link
- **End-to-End Real-World Data Engineering Project with Databricks -** certificate link
